

XBOT Commercial Whitepaper

The Premier On-Chain Trading Solution for the Meme Coin Market

Project Overview

Background

With the rapid advancement of blockchain technology, the Meme coin market has attracted a massive influx of investors due to its high volatility and profit potential. However, the fast-changing market dynamics and technical barriers make it challenging for average investors to capitalize on trading opportunities, as they lack efficient, secure, and intelligent trading tools.

XBOT is committed to solving this pain point by developing a powerful on-chain trading tool designed to help users trade Meme coins more efficiently while mitigating risks.

Project Overview

Vision

XBOT aims to establish itself as the premier on-chain trading platform for the Meme coin market. By combining an innovative tokenomics model with powerful trading features, XBOT will deliver a comprehensive suite of on-chain trading services, empowering users to gain a competitive edge in this rapidly evolving market.

Tokenomics Model

Token Basic Information

Token Name

XBOT

Token Total Supply

100,000,000
tokens

 Mining Rewards
98,000,000 tokens

 Liquidity Pool
2,000,000 tokens

Tokenomics Model

Token Trading Mechanism

Transaction Slippage

There is a 2% slippage for both buying and selling.

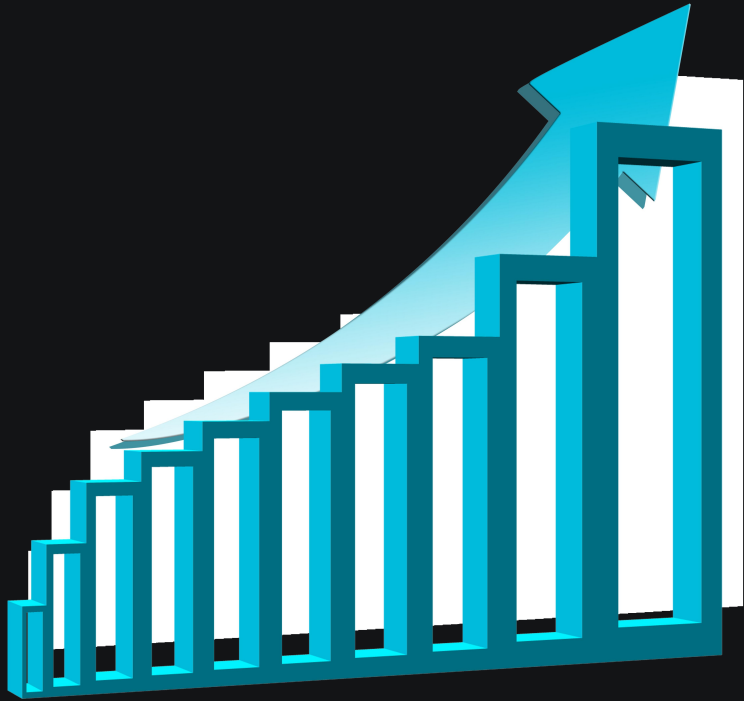

Contract Address

To be supplemented

The Mechanism of Computing Power Mining

Static Revenue

Entry Threshold

Starting from 100 USDT

Profit Ratio

With the gold standard, there is a daily output of 1%

Computing Power Decrease

The computing power decreases by 50% every 100 days. (Permanent Mining)

Computing Power Mining Mechanism

Dynamic Revenue

Computing Power Reward

Invitation Reward

If you invite 1 person, you can obtain the computing power reward from the first generation of invited users. When you invite 10 people, you can get the full rewards from the tenth generation of invited users.

Profit Ratio

First generation: 8%

Second generation: 5%

Third generation: 5%

Fourth to tenth generation: 1%

Computing Power Mining Mechanism

Burning for Mining

Mechanism

Users can obtain production computing power by burning XBOT tokens.

Destruction Conditions

The value of the tokens to be destroyed should start from 100 USDT.

Allocation of Entering Funds

The proportion distribution of users' entry funds

70%: Used for token – buying, burning, and mining.

15%: For automatic LP addition.

12%: For Marketing.

3%: For platform operation.

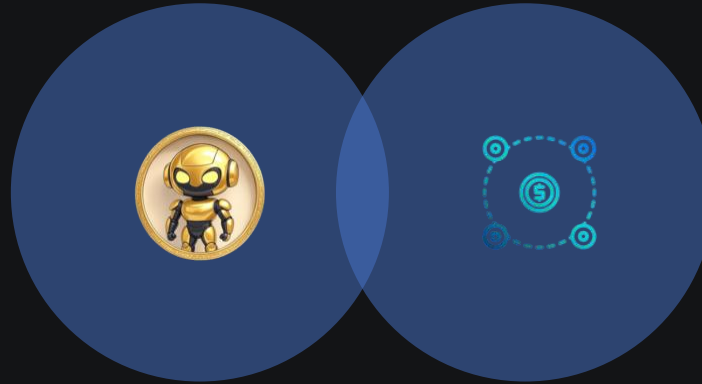

Static and Dynamic Mining Revenue Mechanisms

The mining mode of token
burning continuously
empowers the value of
tokens.

Future Development Plan

First Stage: Attracting Traffic with the Platform Token

Attract users through the XBOT platform token and establish a preliminary user base and community ecosystem.

Second Stage: On-chain Trading Tools

Launch on-chain trading monitoring tools, including smart money monitoring, social media monitoring, and trading copycat tools. These tools help users track the dynamics of large wallets on the chain, provide real-time investment strategy references, and enable them to follow the trading decisions of successful investors. With social media monitoring, users can capture market hotspots and key dynamics in real time, assisting them in quickly responding to market changes.

Target Market

01. Blockchain Investors

Users who are concerned about token trading and mining profits

02. Community promoters

Workshops and individuals attracted through the promotion incentive mechanism

Competitive Advantage

Innovative Mining Mechanism

Combining static and dynamic returns, the burn mining model enhances token value.

Multi-functional tool platform

Powerful trading tools to meet users' diverse needs

Closed-loop ecosystem

Leverage platform tokens to drive user acquisition, progressively expand features, and establish a fully integrated blockchain service ecosystem.

Team & Strategic Partners

Core Team

The XBOT team consists of blockchain technology experts, marketing specialists, and community operations professionals with extensive industry experience.

Marketing Strategy

Partner with global blockchain media and communities to expand brand influence.

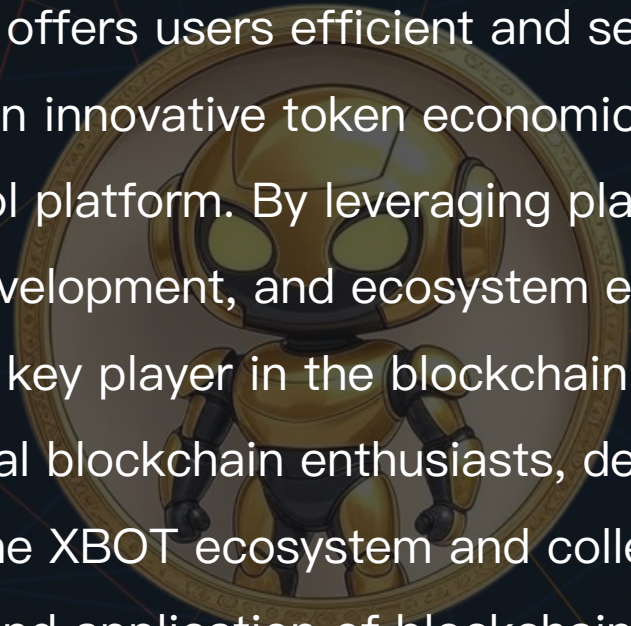

Technical Support

Collaborate with renowned blockchain development teams to ensure platform technical stability.

Summary and Outlook

The XBOT project offers users efficient and secure blockchain services through an innovative token economic model and a multifunctional tool platform. By leveraging platform token incentives, tool development, and ecosystem expansion, XBOT aims to become a key player in the blockchain industry. We warmly invite global blockchain enthusiasts, developers, and investors to join the XBOT ecosystem and collectively advance the development and application of blockchain technology.
